

1) Participation in discussion is an important component of this class, worth 14% of your grade when combined with attendance. Now that we are more than half-way through the semester, reflect on how you contribute.

2) **How often do you participate in your discussion section?**

Choose one option and fill the box completely in pencil or dark-colored ink.

- I contribute several times during every class discussion
- I contribute at least once during most class discussions
- I sometimes contribute to class discussion
- I occasionally contribute to class discussion
- I rarely contribute to class discussion

3) **In what ways do you participate in class discussion?**

Check all that apply. You are not necessarily expected to have done all of these things to receive credit.

- I make a best-effort on thought questions and study them on my own
- I ask questions to prompt discussion in my group
- I volunteer answers or present my group's work to the entire class
- I volunteer to diagram or write on the board
- I make a best-effort to explain topics to other students in my group
- I participate in discussion in other ways not listed here

Please explain: _____

4) **Explain in a few sentences your participation throughout the semester.**

5) **Set a goal for your participation in the remainder of this course.**

6) **If you have any suggestions regarding how we could improve your experience of this course through the remainder of the semester, take a moment to express them here.**
